

## Basic Sealer 100

# Basic Sealer

# Basic Sealer 100

## Compact and Reliable

### Safe & Economical

The unique sealing technique with both heat and pressure gives a safe and clean production of important information. Different kinds of preglued forms or the use of a frame of toner for the sealing, can be processed. The BÖWE SYSTEC Sealer gives great flexibility and short pay-off time.

### Cut Sheets & Continuous forms

The BÖWE SYSTEC Sealer 100 processes cut sheets. There is an option to connect the BÖWE SYSTEC Sealer 100 directly to a burster or a cutter for the processing of continuous forms.

### Versatility & Cost-Efficiency

The BÖWE SYSTEC Sealer 100 is equipped with two folding pockets for single-, wrap-, Z- and double-folding. Perforation wheels are an option, which gives an extra cost-efficient alternative. Simply print plain forms and let the BÖWE SYSTEC Sealer fold, seal and perforate them into finished mailers.

### Easy to Operate

The BÖWE SYSTEC Sealer 100 is very easy to use. There are jam detectors all along the paper path and the machine is easy to control from the operator's panel.

No special training is required.

Options on request e.g. conveyor stacker and integrated burster

From form to finished mailer

## Technical Data

### Standard Equipment

- Infeed unit
- 2 Folding units
- 4 Heaters
- 4 Pressure wheels
- Stacker table
- Jam detectors
- Turning unit

### Options

- Perforation wheels
- Counter
- External connection to solomachines for continuous forms
- Supporting stand
- Extra conveyor stacker
- Integrated burster 8" - 14" for continuous forms

### Dimensions

Length .....	1,600 mm
Width .....	530 mm
Height .....	300 mm
Weight .....	55 kg

### Finish

Two coloured

### Connected Loads

Voltage .....	230V/10 Amp
1 Phase .....	50/60 Hz
Power input .....	max. 1.4 kW
Heat emission .....	0.84 kJ/s

### Output

Up to 5,000 sheets/hour

### Paper Specifications

Length .....	8" - 12"
Width .....	205 - 230 mm
Weight .....	90 - 120 gr/m <sup>2</sup>

Other formats and weights on request.

Order no.: 01/548

Subject to technical modifications.  
Printed in the Federal Republic of Germany, 11/01
